

Installer Setup Checklist

A field workflow checklist for local setup partners supporting robotic mower deployments.

Site review

- Review charging base location, power access, lawn zones, passages, slopes, edges, and connectivity.
- Identify areas that may still require manual trimming or yard preparation.

Setup workflow

- Support first mapping, zone configuration, no-go areas, schedule setup, and first-run observation.
- Confirm owner understands operating limits, app basics, and seasonal maintenance.

Handoff

- Provide homeowner handoff notes.
- Document support issues and recommended follow-up.
- Offer seasonal checkup or restart support where appropriate.

Boundary note: Product availability, pricing, warranty, and territory terms should be confirmed through current Dreame and partner agreements. This material supports partner discussions and is not a public warranty or performance guarantee.
